

Appln. No. 10/716,088  
Amendment dated June 30, 2005  
Reply to Office Action mailed March 30, 2005

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims (deleted text being struck through and added text being underlined):

1. through 10. (Cancelled)

11. (Currently Amended) A bottle holder for supporting a bottle on a support, comprising:

a stalk portion having first and second ends;

a bottle securing means mounted on the first end of the stalk portion for securing to the bottle; and

a support clamping means mounted on the second end of the stalk portion for clamping the support;

wherein the bottle securing means includes a base pad comprising a cup and a resiliently compressible pad positioned in the cup;

wherein the support clamping means comprises:

a clamp member mounted on the second end of the stalk portion, the clamp member having a pair of arms extending away from the stalk portion; and

a clamping strap assembly for releasably clamping the arms of the clamp member toward each other; and

wherein the clamp member is substantially U-shaped, each arm of the pair of arms having an inboard portion and an outboard portion, the inboard portions of the arms diverging as the inboard portions extend away from stalk portion and the outboard portions converging as the outboard portions extend away from the stalk portion.

Appln. No. 10/716,088  
Amendment dated June 30, 2005  
Reply to Office Action mailed March 30, 2005

1        12. (Original) The bottle holder of claim 11 wherein the stalk portion  
2 is flexible to bend upon application of force to the stalk portion and being  
3 adapted to hold a position when the application of force is removed from the  
4 stalk portion.

1        13. (Previously presented) The bottle holder of claim 11 wherein the  
2 bottle securing means further comprises looping means for removably  
3 looping about the bottle.

14. (Cancelled)

1        15. (Original) The bottle holder of claim 13 wherein the looping  
2 means comprises a pair of strap portions, the pair of strap portions  
3 extending in diametrically opposite directions from the base pad, the pair of  
4 strap portions each having a free end, the looping means further comprising  
5 fastening means being positioned on each of the free ends of the strap  
6 portions for releasably fastening the free ends of the strap portions together  
7 to secure the bottle against the base pad.

16. through 17. (Cancelled)

1        18. (Currently Amended) The bottle holder of claim [[[16]]] 11  
2 wherein the support clamping means additionally comprises padding  
3 mounted on an interior of the clamp member for positioning against the  
4 support.

1        19. (Currently Amended) The bottle holder of claim [[[16]]] 11  
2 wherein the clamping strap assembly comprises:  
3        a. clamping strap; and  
4        releasable fastening means releasably fastening the clamping strap to  
5 the arms of the clamp member, the releasable fastening means being

Appln. No. 10/716,088  
Amendment dated June 30, 2005  
Reply to Office Action mailed March 30, 2005

6 mounted on outer surfaces of each of the arms of the clamp member and on a  
7 side of the clamping strap.

1 20. (Previously presented) A bottle holder for supporting a bottle on a  
2 support, comprising:

3 a stalk portion having first and second ends;

4 a bottle securing means mounted on the first end of the stalk portion  
5 for securing to the bottle; and

6 a support clamping means mounted on the second end of the stalk  
7 portion for clamping the support;

8 wherein the stalk portion is flexible to bend upon application of force  
9 to the stalk portion and being adapted to hold a position when the  
10 application of force is removed from the stalk portion;

11 wherein the bottle securing means comprises:

12 a base pad mounted on the first end of the stalk portion; and

13 looping means for looping about removably looping about the  
14 bottle;

15 wherein the base pad includes a cup and a resiliently compressible pad  
16 positioned in the cup;

17 wherein the looping means comprises a pair of strap portions, the pair  
18 of strap portions extending in diametrically opposite directions from the  
19 base pad, the pair of strap portions each having a free end, the looping  
20 means further comprising fastening means being positioned on each of the  
21 free ends of the strap portions for releasably fastening the free ends of the  
22 strap portions together to secure the bottle against the base pad;

23 wherein the support clamping means comprises:

24 a clamp member mounted on the second end of the stalk portion,  
25 the clamp member having a pair of arms extending away from the stalk  
26 portion; and

27 a clamping strap assembly for releasably clamping the arms of  
28 the clamp member toward each other;

Appln. No. 10/716,088  
Amendment dated June 30, 2005  
Reply to Office Action mailed March 30, 2005

29 wherein the clamp member is substantially U-shaped, each arm of the  
30 pair of arms having a inboard portion and an outboard portion, the inboard  
31 portions of the arms diverging as the inboard portions extend away from  
32 stalk portion and the outboard portions converging as the outboard portions  
33 extend away from the stalk portion;

34 wherein the support clamping means additionally comprises padding  
35 mounted on an interior of the clamp member for positioning against the  
36 support; and

37 wherein the clamping strap assembly comprises:

38 a clamping strap; and

39 releasable fastening means releasably fastening the clamping  
40 strap to the arms of the clamp member, the releasable fastening means  
41 being mounted on outer surfaces of each of the arms of the clamp  
42 member and on a side of the clamping strap.

1 21. (Previously presented) The bottle holder of claim 11 wherein the  
2 resiliently compressible pad substantially fills an interior of the cup.

1 22. (New) A bottle holder for supporting a bottle on a support,  
2 comprising:

3 a stalk portion having first and second ends;

4 a bottle securing means mounted on the first end of the stalk portion  
5 for securing to the bottle; and

6 a support clamping means mounted on the second end of the stalk  
7 portion for clamping the support;

8 wherein the bottle securing means includes a base pad comprising a  
9 cup and a resiliently compressible pad positioned in the cup;

10 wherein the bottle securing means further comprises looping means for  
11 removably looping about the bottle;

12 wherein the looping means comprises a pair of strap portions, the pair  
13 of strap portions extending in diametrically opposite directions from the  
14 base pad, the pair of strap portions each having a free end, the looping

15 means further comprising fastening means being positioned on each of the  
16 free ends of the strap portions for releasably fastening the free ends of the  
17 strap portions together to secure the bottle against the base pad.

1

1 23. (New) The bottle holder of claim 22 wherein the stalk portion is  
2 flexible to bend upon application of force to the stalk portion and being  
3 adapted to hold a position when the application of force is removed from the  
4 stalk portion.

1

1 24. (New) The bottle holder of claim 22 wherein the support clamping  
2 means comprises:

3 a clamp member mounted on the second end of the stalk portion, the  
4 clamp member having a pair of arms extending away from the stalk portion;  
5 and

6 a clamping strap assembly for releasably clamping the arms of the  
7 clamp member toward each other.

1

1 25. (New) The bottle holder of claim 24 wherein the support clamping  
2 means additionally comprises padding mounted on an interior of the clamp  
3 member for positioning against the support.

1

1 26. (New) The bottle holder of claim 24 wherein the clamping strap  
2 assembly comprises:

3 a clamping strap; and

4 releasable fastening means releasably fastening the clamping strap to  
5 the arms of the clamp member, the releasable fastening means being  
6 mounted on outer surfaces of each of the arms of the clamp member and on a  
7 side of the clamping strap.
